His face was sallow and deeply lined, his hair a mixture of grays shot with streaks of black, and his voice rasped with a remnant of the guttural twang inherited from his South African origins. "Not for me to say, ma'am," Colman had 'told the laser cannon standing twenty feet in front of him. "I'm not an expert on handsome men.". Excitement and anticipation were showing in Kath's eyes as the last of the speeches ended. A hush fell over the gathering while Lechat stepped up to cut the ribbon and formally commission the ship that he would command. Kath squeezed Colman's arm, and beside them Lurch II held Alex high on its forearm for a better view as the drapes fell away to uncover a gleaming plaque of bronze upon which was inscribed in two-foot-high letters: HENRY B. "I'm not at all sure that I could be much help. Government of what in particular?". The darkness of the woods.. The inverted logic that had puzzled him had not been something peculiar to the military mind; it was just that the military mind was the only one he had ever really known. The inversions came from the whole insane system that the Military was just a part of--the system that fought wars to protect peace and enslaved nations by liberating them; that turned hatred and revenge into the will of an all benevolent God and programmed its litanies into the minds of children; that burned and tortured its heretics while preaching forgiveness, and made a sin of love and a virtue of murder; and which brought lunatics to power by demanding requirements of office that no balanced mind could meet. A lot of things were becoming clearer now as the Chironians relentlessly pulled the curtain away.. Bernard was rubbing his lip slowly as he thought about it. He caught Lechat's eye and appeared worried. "The message would have to go out live from there," he said slowly.. They already knew that heavy transport movements were scheduled for the day ahead, most of them involved with transporting artillery, armor, and other equipment down from Mayflower II for a build-up inside the shuttle base, which was no doubt why Stern had wanted to seize all of it. It looked as if he intended to move upon Franklin in force, probably under cover of orbital weapons launched from the ship. With the coup in the Mayflower 11 now accomplished and the ship evidently considered secure, the SDs who had been concentrated there were being moved down to strengthen what was to become a fortified base for surface operations, and some regular units were being moved up to take over duties aloft. Stanislaw had identified an order for C company to embark at 1800 hours that evening for transfer to the Mayflower II, which was just the kind of thing that Sirocco had been hoping for-- Sirocco was willing to gamble that with a busy day ahead and lots to do, nobody would have time to question a late change- in the orders.. ".Colman's eyebrows arched in surprise. "True, but-wow! I had no idea that anything here was that advanced." Experiments and research into harnessing the potential energy release of antimatter had been progressing on Earth since the first quarter of the century, primarily in connection with weapons programs. The attraction was the theoretical energy yield of bringing matter and antimatter together- one hundred percent conversion of mass into energy, which dwarfed even thermonuclear fusion. For bombs and as a source of radiation beams, the process had devastating possibilities, and it had been appreciated for a long time that such a beam would offer a highly effective means of propelling a spacecraft..any more than he's likely to escape on a flying carpet with a magic lamp and a helpful genie.. "Only one boy in a wheelchair, as far as I know."..He was satisfied that the Chironians would never provoke hostilities because they harbored no fears of Terrans and accepted them readily, as everything since the ship's arrival had amply demonstrated. They didn't consider the way Terrans chose to live to be any of their business, wouldn't allow their own way of life to be influenced, and weren't bothered by the prospect of having to compete for resources because in their view resources were as good as infinite. But he felt less reassured about the Terrans- at least some of them. Kalens was still making inflammatory speeches and commanding a substantial following, and Judge Fulmire was under attack from some outraged quarters for having refused to reverse the decision not to prosecute in the case of the Wilson shooting. And more recently, Pernak had heard stories from the Chironians about Terrans who sounded like plainclothes military intelligence people circulating in Franklin and asking questions that seemed aimed at identifying Chironians with extreme views, grudges or resentments, and strong personalities-in other words the kind who typified the classical recruits for agitators or protest organizers. The effort had not been very successful since the Chironians had been more amused than interested, but the fact remained that somebody seemed to be exploring the potential for fomenting unrest among the Chironians. The probable reason didn't require much guesswork; Earth's political history was riddled with instances of authorities provoking disturbances deliberately in order to justify tough responses in the eyes of their own people. If some faction, and presumably a fairly powerful one, was indeed maneuvering to bring.Everybody looked at Colman again, this time with a new interest.
